
(a) one cross-section: fit against the data it was fitted to
Pr(S ≥ s)
epidemic size s (cases)
DKW 95% band (half-width 0.016)
empirical (Kaplan-Meier)
fitted ζ(α, s)/ζ(α, x_min), α = 1.92
(b) out-of-season transport -- the test that is not circular
departure, in DKW-band units
target season
pair (α_t, x_min,t) applied to season t+1
pair re-fitted inside season t+1
edge of the DKW band
